FIRE PROTECTION ASSOCIATION  
OF SOUTHERN AFRICA

# Course Details

**SIGN ME UP BOSS!**  
It's only 1 day  
+  
Lunch is provided :)

## OBJECTIVE:

The course objective is to equip delegates with a good understanding of passive fire protection systems and the principles of firestop. After completion of this training, delegates will have a good understanding of passive firestopping, compartmentation, firestop system approach and approval bodies regulating the industry.

---

## COURSE DESCRIPTION:

- Understanding the importance of Passive Fire Protection and the different fire stopping systems.
- Define a fire compartment and compartmentation.
- Review & outline the impact of passive fire protection within a business and the community.
- How to restore the integrity of compartments that have been breached by services and other openings.
- What are the relevant codes, building regulations and the different types of fire system tests applicable.
- Understanding the fundamentals underpinning the inspection of passive fire protection.
- Review some of the most common industry myths and misconceptions on firestop solutions.
- How not to firestop: a list of design bad practices and a case study showing the consequences of such practices.
- How to firestop: a list of design best practices to consider and a case study showing the consequences of such practices.
